PLAN PROJECTS BACKWARDS

Course Outline
PMI Processes for Planning Projects Breakthroughs

OVERVIEW

This international course produces detailed & realistic plans ready for executing complex projects. The planning processes start with 'Objective Statements', for Stakeholder approval. The project solution is then designed, followed by detailed execution planning.

Learning lessons from the project is the final stage.

LEARN HOW TO OVERCOME THESE CHALLENGES

- Lack of clarity in project objectives & what's included
- Lack of senior management support
- No awareness across teams of projects plans
- Plans don't allow for things going wrong
- Plans are not sufficiently detailed to manage projects
- No agreed/written processes on how to plan
- Too many changes to project scopes
- Project objectives are not linked to organisational goals

TRAINING THAT CHANGES BEHAVIOURS

1. Understand desired conclusion
2. Use knowledge & resources of team
3. Communicate continuously
4. Keep users central to plan
5. Think out of the box for designs
6. Use logic for execution plan
7. Stay on top of risks
8. Review team project processes

INSTRUCTOR-LED FORMAT

▶ Face-to-face 8 hours

CLASS SIZE

▶ Maximum 20 participants

1-1 ONLINE COACHING

▶ 60min follow-up to tailor the learning

DON'T JUST TAKE IT FROM US...

Google Reviews ★★★★★

"The course focuses on the most important part of any project, getting it off the ground. It has fundamentally changed how I plan and initiate projects."

John Bourke, Project Director
Pharmaceutical Industry
